Assassination Rogue
Discipline Priest
VS
Retribution Paladin
Holy Priest
BIA Season 3 - 2440 MMR

Make sure to abuse this ability as you can use to slow down an enemy from a distance to allow your team to close on them and get control of the crowd for you. You can also use it to dodge the control skills of the physical crowd, such as the kidney shot or the mighty Bash. Garrote generates 1 combo point. 1.1. Before Gates Open Discuss with your team to have a game plan. 06 Apr. Wasting an entire go why you have not planned and broken the control of the crowd the other can make the game lose. Press stealth and you are good at going! 1.2. Control of the crowd during the assistance Rogues has no control compared to other rogue specializations that still have access to powerful control skills. 2020: updated rotations to include the ability of the pact. You do not want to spend too many combo points on this skill like your next Envenom extend with cut to the chase. With the legendary brand of the master killer, it can also be used offensively. Playstyle for Assassination Rogues Assassination Rogue has two PVP roles: the control of the enemy team with SAP, Blind, Cheap Shot, Garrote, Distract and Poisoned Knife, and face extremely high damage to the target of killing while blocking them with the kidney shot. The burst is not included in this so that you have an example of an unpleasant forerunner of the Cooldowns. You will also be able to cheap shot or garrote the DPS you don't want to kill to allow your team to follow the control of the crowd, and then move on your goal of killing with a stroke of kidney. Slice and dice should have almost 100% uptime during a match in Arena. In this way the goal does not react to your kidney blow and allow you to apply your ability alliance and shiv without reacting. 05 Dec. You can also benefit from Mark of the Master Assassin if you play, too no matter that much if you need to apply your bleeding to your goal while it lasts. 2022: Updated for Patch 9.2. 10 Nov. Can be used when multiple enemies, including itmetop e itanimoc itnap onareneg Atiliba emucA attol al azimi emoc ereleges ioup odnauq oiggaftav li. Ad it hlaetS onnad id atidrep ani. The burst rotation will then be as follows. Use Garrote if it is about to fade. 2020: Removed outdated Traits and Essences. Garrote silences the target and generates 1 Combo Point. Use Envenom with 4 Combo Points or more. If you forced a trinket in the opener you are on the right track to win the game. Crimson Vial is a small healing over time effect. Players often react to Vendetta with powerful defensive cooldowns. 2021: Updated the Poison of choice. Use this when the enemy team is using offensive cooldowns on you. If you are using the Legendary Mark of the Master Assassin you will include Vanish in your rotation in order to gain the 100% Critical Strike chance buff. Rupture is a bleed that lasts longer based on how many Combo Points you use. Otherwise you may want to keep it for your Kidney Shot windows, as it deals more damage than your other Combo Point builders. When not in Stealth, you generate Combo Points with the following: Mutilate deals moderate damage and generates 2 Combo Point. Fan of Knives is an AoE ability and will generate 1 Combo Point plus 1 Combo Point per critical hit. Then, when you have enough Combo Points, you can press Vendetta, Vanish if you play Mark of the Master Assassin, and Envenom at the same time to guarantee that this first Envenom hits your target before any defensive ability is used. Be aware that you have the passive Seal Fate that will award you an additional Combo Points when you critically strike with a Combo Point builder. Apply Deadly Poison (Wound Poison is still a viable option although you miss out on a lot of damage) and Crippling Poison. Show more Show less 3. For this reason, we have a page dedicated to them. As Assassination Rogue you can have some measure of burst every Kidney Shot, even if you do not have your major burst cooldowns. 2021: Updated the rotation slightly for Patch 9.1. 28 Apr. Envenom is your primary damaging Shiv generates 1 combined point. 2020: Updated for Shadowlands pre-Patch. The second resource are the combined points. Feint (with the talent of the hellions) is the most difficult, but more useful defensive skill, a thief. Slice and dice increase the attack speed. 2021: rewritten by Shadenox and further updated for patch 9.0.5. 08 March. There are some different open ones as an assassination rogue depending on whether the enemy can use the spells as he was silenced or not. Open is a fundamental part of the game as a rogue. 2.2. The opening The Open refers to the CC chain opening your team and damage as soon as you get out of the doors. It can be critically hit with one hand or with both. The outbreak is included in this example, but if you want to open up without using recovery you can perform exactly the same open without using revenge and sepsis, scourge or reproaches echoing according to your alliance. Use slice and dice with 2 or 3 combined points. Since Shiv and marked for death has a recovery time similar to the decreased returns of the stunning that you have to wait to use the kidney shot again, you will make them ready every shot of kidney. You should try to collaborate with a class that has a lot of control of the crowd, such as wizards or priests. 2020: Updated open -end and bursting rotations. The assassination Ragi may not have extended control options that other rogue specializations offer, but compensate it being very disruptive for their target of killings with kidney shots, paralyzing poison and high and exploded damage and hemotoxin. The first, energy, is quite simple. This can be used for renal shooting to set control of the crowd or for a further Envenom during an attempt to kill. In the APRI, since you have access to your invisible -based skills, you will aim to push and start the control of the crowd on the healer (lymph if they are not in combat, blind blind Cheap). Cloak of Shadows is a strong defensive cooldown when playing against casters. Assassination Rogue Utili Pvp macro 5. The new Assassination Rogue 2-Piece bonus also causes Shiv to increase Bleed and Poison damage by 40% on all enemies within 15 meters. This means that this capacity can generate up to 4 Combo Points with Seal Fate, another Combo Point by critically striking. However, you have the ability of Poisoned Knife. Below is an example of the opener on a target that can not use any skill while silence, like a Mage. It can also be used offensively sometimes, for example against a Gun Warrior, as it prevents them from using the parry, or against a Death Knight, as it prevents them from using the Death Strike to heal. During the game, unless you use Vanish, you will not be able to help much with the control of the crowd apart from the rene blow on the goal of killing. If the goal of killing is a caster that can't do anything while in a silence you can use Garrote and Rupture before using Marked for death and the rene Shot. 03 Jul. Never use Shiv or marked for death outside a kidney shot window. This should be used if you have slowed down/rooted and cannot reach your goal, but are about to overcome energy, or if a gamma enemy must be slowed down. From Stealth or when Subterfuge is active, there are 3 ways to generate Combo Points: Cheap Colpo hits the target and generates 1 Combo Point. It is assumed in the following burst rotation that you applied bleedng before pressing the trigger. The main goal in the opener is to force enemies to use their colds. Of course it can be used when the enemy team is using colds even if there is no storm. Here are the skills you will spend Combo Points on and what situations you will use them in: Kidney Shot is your stallion to set a kill on your goal. Use this when in trouble against caster teams and run to safety. This will be more damage el AhcreP enoiscicu nu ossesps otlom A otseuq e asoclaug isu ehc amirp monevE etrom al rep dekrAm out li ehcna Arretto is otme! Both Deadly Poison and Wound Poison will be removed after each Arena game, so don't forget to reapply every time you enter a new game. To maximize damage output and energy regeneration you need to use Combo Points efficiently. Assassination Rogue is a specialization that is often played in configuration comps and that means that you and your team have to agree on who to control and who to kill before the start of the game, and you need to know who will use their offensive cooldowns before. And sometimes, the enemy team will go into combat before they can use Sap. This is a very powerful tool for mitigating incoming damage. It guarantees a 30% plate damage reduction from all to 6 seconds on a cooling of 15 seconds. Poisoned knife does very little damage, but generates 1 Combo point and applies all your active poisons to the target. Of course, unless you are in the opener, you will have both Garrote and Rupture on your goal before using your burst rotation. Use Mutilate to generate Combo Points, or Serrated Bone Spike if you have it. Macros It is recommended to use Macros to use abilities on enemies or allies without having to aim them. 1. As a Rogue Assassination you don't have a passive that makes it better to use your quilters with 5 Combo Points, but you should try to do so regardless of whether they treat more damage like that. Evasion is a strong defensive cold when playing against melees and Hunters. Assassination Rogues have strong damage sustained so unless you need to withdraw because you are under pressure or because you know that the enemy is going to set a kill of them you want to continue to do harm to make sure that the goal of killing is low on health before your next kidney blow. Now that you know how to generate Combo Points, knowing how to spend them is even more important. You shouldn't use this skill too much as Cut to the Chase you use Envenom. For both these scenarios there is an alternative fore-runner. Offensive rotation 2.1 Generation and expenditure on literature.
